

September 24, 2020

Dear Millersburg Area School District Community:

The Pennsylvania Department of Health (DOH) notified the District that there are two (2) probable cases of COVID-19 on the girls' volleyball team. Members of the team have been notified and are quarantining per the Department of Health's recommendation. Members of the District's Pandemic Crisis Response Team have communicated directly with DOH staff to conduct a thorough risk assessment and determined that there were no close contacts during the school day. The District has followed all guidance provided by the DOH. As a result, the DOH has recommended that the District continue operating under normal conditions.

The Department of Health has established procedures for timely communication with school districts when there is a probable or positive COVID-19 case. Contact tracing and isolation of positive cases or quarantine of close contacts can slow and stop the transmission of COVID-19. ***The individuals who present as probable or positive COVID-19 cases will not be identified.***

As always, we encourage you to monitor yourselves and your family for the following symptoms:

- Fever (100.4 degrees or above)
- Cough
- Body Aches
- Shortness of Breath
- Loss of taste/smell

If you experience any of the symptoms above, please contact your physician for instructions and care.

The [CDC](#) continues to serve as a tremendous resource to aid you in finding up-to-date and reliable guidance about coronavirus. Please continue to educate yourselves on what you can do to protect your family and others.

The safety and security of our students and staff remain our highest priority. We thank our entire school community for your ongoing effort in following established protocols to reduce the spread of COVID-19.

Sincerely,

Thomas J. Haupt
Superintendent
