

November 3, 2020

Dear Millersburg Area School District Community:

The Millersburg Area School District has been notified that a person with a confirmed case of COVID-19 was present in the district while unknowingly infectious. This information has been investigated and confirmed by the Pennsylvania Department of Health (DOH). The individual has not been in the building within the past five days. Members of the district's Pandemic Crisis Response Team have communicated directly with DOH staff to conduct a thorough risk assessment, determine that there was one close contact while in the district, and determine specific cleaning and disinfecting protocols per [CDC Guidance on Cleaning and Disinfecting](#). The individual who was identified as a close contact has been notified and is quarantining at home. The District has followed all guidance provided by the DOH. As a result, the DOH has recommended that the District continue operating under normal conditions.

The Department of Health has established procedures for timely communication with school districts when there is a probable or positive COVID-19 case. Contact tracing and isolation of positive cases or quarantine of close contacts can slow and stop the transmission of COVID-19. ***The individual who presents as a probable or positive COVID-19 case will not be identified.***

As always, we encourage you to monitor yourselves and your family for the following symptoms:

- Fever (100.4 degrees or above)
- Cough
- Body Aches
- Shortness of Breath
- Loss of taste/smell

If you experience any of the symptoms above, please contact your physician for instructions and care.

The [CDC](#) continues to serve as a tremendous resource to aid you in finding up-to-date and reliable guidance about coronavirus. Please continue to educate yourselves on what you can do to protect your family and others.

The safety and security of our students and staff remain our highest priority. We thank our entire school community for your ongoing effort in following established protocols to reduce the spread of COVID-19.

Sincerely,

Thomas J. Haupt

Superintendent
